

Frequency Specific Low Level Laser Therapy

Announcing Neoplasia and Endocrine Disease Protocols!

"It's all about the animals"

October 23-24, 2010 McKinney, TX

Frequency Specific Veterinary Low Level Laser Therapy (VLLLT)

Featuring: **Wm. (Bill) L. Inman BS, BS, DVM, CVCP**

Wm. L. Inman is author and originator of the VOM Technology, Veterinary Low Level Laser Therapy, Veterinary Myofascial Release Technology and Veterinary Somato-visceral Technology.

He graduated Phi Beta Kappa, Alpha Psi, Cum Laude from WSU with degrees in Veterinary Science, Microbiology and Immunology, and a Doctorate in Veterinary Medicine. He maintained a veterinary practice in Seattle, WA for 17 years. He began teaching in 1997 and since has trained in excess of 7600 doctors in areas pertaining to clinical veterinary practice. He has presented his materials at UC Davis Veterinary School, Western States Chiropractic College, Numerous State Annual Veterinary and Chiropractic conferences. He conducts VOM and Low Level Laser Therapy seminars throughout the US and in 10 other countries and actively supports practitioners he has trained.

- **Veterinary Low Level Laser Therapy (VLLLT) vs. "laser bath" technology, comparing apples and oranges**
- **Physics of the devices and why more is not better**
- **Wavelength and power considerations and why one is better than another**
- **Exacting frequencies directed to healing specific tissues**
- **What, how, when, and where can VLLLT be used and at what success rate**
- **Financial concerns and return on investment, why only one case will pay for the device and training**
- **Human application considerations, references, and resources**

REGISTER NOW!

Course Syllabus

- New updates for all methodologies
- Revolutionary new protocols for endocrine diseases such as Diabetes, Cushing's Disease, Hypo and Hyperthyroidism
- Protocols for neoplasia and malignancies
- Chaos Conversion Theory and a new Chaos Conversion Therapy Frequency list
- Updated and expanded animal and human frequency lists
- Simplified and streamlined updates to methodology
- Advances in allergy elimination technology for difficult cases
- Case history presentations
- Three-headed laser applications and benefits, 12 frequency simultaneous lasering
- Non-Surgical Lipoplasty
- Veterinary Low Level Laser Therapy basics and theory
- Application methods and treatment regimens
- Dual head laser approach to neuronal reprogramming
- VLLLT application to Subluxation reduction
- Autonomic and somato-visceral laser application
- Application for epilepsy and other idiopathic convulsive disease processes
- Diseases of the equine and bovine foot and hoof
- Diseases of the equine hock, fetlock and carpus
- Diseases of the K-9 and feline stifle, non-surgical treatment of ACL
- Veterinary Allergy Removal Technology (VART)
- Immune-mediated and autoimmune disease treatment
- Neuro-Emotional Deprogramming Therapy
- Sympathetic Overstimulation Therapy for performance enhancement
- Specific small animal case studies
- Specific equine case studies
- Bovine applications, dairy production, breeder and rodeo bull applications
- Practical financial considerations and return on investment
- Practice Management with the VLLL Technology
- Advanced Veterinary Frequency List
- Support and further study

LOCATION

Erchonia®
Corporate Office
2021 Commerce Dr.
McKinney, TX 75069
Phone: **214.544.2227**

HOURS
